**XR-3 PW**  
By Seaman Corporation

Backed by 30 years of proven performance, XR-3® PW is the membrane preferred by more engineers and utility owners for the containment of potable water. This high strength, puncture, tear and UV resistant membrane is the only coated fabric with NSF 61 approval for potable water contact.

Whether used for floating covers, finished water baffles, raw water ponds or other potable water applications, XR-3® PW Geomembranes retain their flexibility and perform better than any other membranes in the world.

The **XR-3 PW** Difference  
vs. CSPE and Polypropylene

- Only coated fabric with NSF-61 approval
- Higher tensile strength
- Superior puncture and tear resistance
- Easier repairs
